

## Optimal care for orchids

Two new products have landed in the UK and are already flying off the shelves.

The *Organic Orchid Feed* and *Orchid Vitaliser* from Neudorff have been developed to promote vigorous, healthy growth and provide additional care for your prize orchids.

The *Organic Orchid Feed* is of 100% vegetable origin and provides a content rich liquid feed with all essential main and trace elements, vitamins, enzymes and growth-promoting substances which strengthen the plants and promote flower formation.

With its abundance of valuable ingredients the feed also supplies the micro-organisms in the soil with vital nutrients. This stimulates the soil and reduces the risk of unilateral propagation of harmful fungi. Results show that plants treated with *Organic Orchid Feed* provide abundant flowers for the entire season.

The *Orchid Vitaliser* contains a variety of different plant extracts. It acts as a mist and is sprayed directly on to the leaves to create an increased level of natural humidity. It does not leave any lime spots on the leaves and poses no risk to humans and pets.
