

Give flying pests the yellow card

The yellow card so beloved by sporting referees will mean something entirely different to flying pests that attack your house plants – for them their time is up.

The *Plant-Flycatcher* from Neudorff is an odourless yellow card that is 100% pesticide-free and is placed into the plant pot. Its special shade of yellow attracts a range of flying pests including white fly, greenfly, winged aphids, leaf miners and black fungus gnats. Once attached, they cannot escape.

The *Plant-Flycatchers* retain their 'stickability' and will not dry out if placed near a radiator or in sunlight. They will not drip and are not affected when the plant is watered - it still remains protected from attack.

The *Plant-Flycatchers* were launched onto the UK market this spring.

Neudorff have specialised in the development and production of natural gardening products for more than 150 years and is Europe's leading producer of natural garden products.

A pack of ten *Plant-Flycatchers* has a rrp of £ 4.99.
