

Natural help for overwintering patio plants without pests

When the nights get cooler, patio plants should be taken to winter quarters. To avoid bringing pests into your house, you should treat your plants in advance. In case of infestation, there is a new of treating them effectively and in an environmentally friendly way:

Pyrol Bug & Larvae Killer from Neudorff, Europe's premier producer of natural garden products, contains the active ingredient pyrethrum which is derived from the chrysanthemum flower, a native of the Kenyan highlands.

Works effectively with the power of nature: Pyrol Bug & Larvae Killer

The unique formulation of *Pyrol Bug & Larvae Killer* controls a range of harmful pests including aphids, whitefly, greenfly, spider mites, mealy bugs, scale insects, leaf hoppers and thrips. It also acts on the eggs and larvae of the insects to provide extended periods of control.

Pyrol Bug & Larvae Killer is available as a ready-to-use 750 ml trigger spray (RRP £5.49) and as a 250 ml concentrate (RRP £12.99).

Pyrol Bug & Larvae Killer is one of the highlights in the Neudorff range. The company has specialised in the development and production of natural gardening products for
