

What you need for growing strawberries on the balcony

<input type="checkbox"/>	Pot or balcony trough, always with a hole in the bottom. Min. 20 cm high with a diameter of min. 15 cm. (You get special strawberry pots in which several plants grow on top of each other. Hanging baskets also work well and save space.)
<input type="checkbox"/>	Preferably a peat-free plant substrate
<input type="checkbox"/>	Clay shards or a small stone to cover the drainage hole
<input type="checkbox"/>	Drip tray (appropriate for the pot)
<input type="checkbox"/>	Strawberry plants (e.g. everbearing strawberry varieties such as “Siskeep”, “Magnum Cascade” or “Cupido”, which bear fruit till October)
