Neudorff's new Project Guides inspire the nation to get growing

With millions taking-up gardening during the pandemic, Neudorff has published a series of free Project Guides on their website – providing gardeners with easy-to-follow, step-by-step advice to transform their organic grow-your-own ambitions into reality.

The five guides, at www.neudorff.co.uk/projects, include building raised beds, planting-up beautiful balconies and patios, growing potatoes in tiny spaces and cultivating tomatoes and strawberries on patios and balconies. As well as bringing grow-your-own to a wider audience that does not have access to a garden, an extra guide will focus on helping gardeners to tackle aphids, a common pest of flowers, fruit and veg.

In addition to providing comprehensive guidance, Neudorff offers a leading portfolio of organic liquid fertilisers that harness the power of natural, organic raw materials to help gardeners cultivate brilliant flowers, fruit and vegetables in a manner that's gentle to people, pets and the environment. All Neudorff fertilisers are certified by the Organic Farmers & Growers Association. Highlights include:

Neudorff Organic Tomato Feed – This organic liquid compound fertiliser is approved for vegan use. It is made from natural plant materials and is a natural by-product of sugar beet production. It contains a high level of potassium for healthy, tasty tomatoes while also providing excellent results on all edible crops.

Neudorff Organic Multipurpose Plant Feed – The go-to choice for beautiful ornamental plants as well as houseplants, it's packed with vitamins, enzymes and vegetation-supporting substances that have been tailored to enhance plant growth

and promote flower development. This liquid compound fertiliser is made from natural plant materials.

Neudorff Organic Rose Feed – Roses have consistently been voted the nation's favourite flower and Neudorff's organic fertiliser is the one to choose for those classic big, beautiful and fragrant rose blooms. It has been formulated to enhance the growth of roses and promote flower development.

In addition to its liquid fertiliser range, Neudorff also offers **Organic Multipurpose Plant Food**. Made from natural raw materials, plus added microorganisms, incorporating mycorrhizal fungi for strong plant growth, this feed contains all the nutrients required for healthy, high-yielding crops.

Guy Jenkins, Consumer Manager at Neudorff's UK distribution Partner, DLF Seeds Ltd, said: "Neudorff's free online project guides, combined with a leading portfolio of organic liquid fertilisers and plant protection products, will provide gardeners with everything they need to know to grow flowers, fruit and veg successfully and with confidence this season."

Neudorff, experts in natural gardening since 1854, is one of the few companies worldwide to develop its own plant protection and plant care products, with the widest range of products certified by the Organic Farmers and Growers' Association. Since entering the UK market in 2012, the company has built-up an enviable reputation for offering the highest quality gardening products that are gentle to people, pets and the environment.
