Wipe out weeds with Neudorff's WeedFree Plus

With Neudorff's fast-acting WeedFree Plus gardeners can achieve long-lasting control against regrowth of invasive annual and perennial weeds without resorting to using glyphosate.

Available as a handy ready-to-use spray or concentrate, WeedFree Plus tackles unwelcome invaders that commonly blight the appearance of gardens, such as ground elder, dandelion, stinging nettles, chickweed, plantain, field horsetail and thistles, as well as grasses.

For gardeners who are striving to cultivate plots in a manner that's kinder to the environment, WeedFree Plus continues to tick all the boxes. In addition to providing fast, visible results, treated areas can also be replanted after just one day while children and pets can enter treated areas as soon as the spray has dried. The formulation is biodegradable, too.

Guy Jenkins, Consumer Manager at Neudorff's UK distribution Partner, DLF Seeds Ltd, said: "There has been a distinct shift away from the use of glyphosate-based weedkillers in the garden, and Neudorff's WeedFree Plus offers gardeners a glyphosate-free alternative that doesn't compromise on performance. Fast acting with visible results within a day after treatment, while providing effective control against weed regrowth, WeedFree Plus is a proven winner.

"Additionally, the increasing frequency of mild, wet winters which results in weeds actively growing later into the season, is driving demand for weedkillers that cut the chore of weeding by providing long-lasting results."

The secret behind WeedFree Plus is also Neudorff's unique combination of two active ingredients. Pelargonic acid, which is found naturally in pelargoniums, results in weeds drying out within 24 hours of treatment while maleic acid hydrazide target

roots so they're no longer able to carry on growing. The result is a weedkiller that gets to work fast, providing superior control during the major growth cycle of weeds.

Neudorff also has the ultimate solution for ridding paths of moss and algae, which can present a slippery hazard, especially after periods of wet weather. Fast Acting Moss & Algae Killer Concentrate is also based on pelargonic acid, is biodegradable and offers fast, visible results while being 100% glyphosate-free.

A 750ml pack of WeedFree Plus has a RRP of £8.75 while a 1,020ml pack of WeedFree Plus Concentrate has a RRP of £23.75, and a 1l bottle of Fast Acting Moss & Algae Killer Concentrate has a RRP of £15.99.
