

## What you need for your bucket-potato project

<input type="checkbox"/>	Plastic bag made of PVC or another large pot with water drainage at the bottom, a capacity of at least 30 litres, the larger the better. There are extra potato bags or pots for this.
<input type="checkbox"/>	Waterproof base (e.g. clay drip tray)
<input type="checkbox"/>	Seed potatoes, preferably organic. Potatoes from the supermarket are usually not suitable because they are treated with agents that inhibit sprouting.
<input type="checkbox"/>	Expanded clay as drainage layer
<input type="checkbox"/>	A peat-free plant substrate; preferably a soil especially suited for tomatoes and vegetables
